

7 things you should know about the MicrobiomeSupport project

#1 MicrobiomeSupport is an EU-funded Coordination & Support Action to **globally map microbiome research** & to identify future research needs

#2 MicrobiomeSupport focuses on research & innovation in the **food system**

#3 Main challenges: a promising field with innovative potential for health, food and the circular economy in **need of more and coherent funding as well as better regulation and harmonized standards**

#4 MicrobiomeSupport's **main tasks:** **harmonization** of definitions, standards and practices in microbiome research; **alignment** of research and innovation agendas; stakeholder **engagement, communication** and **awareness raising**

#5 The project supports the European Commission by coordinating the activities, meetings, workshops and results from the **International Bioeconomy Forum (IBF)** working group 'Food Systems Microbiome'

#6 MicrobiomeSupport has a **Policy Advisory Board**, an **Industry Advisory Board** and an **Expert Pool** of European & international microbiome experts

#7 Four **Innovation Actions (IA's)** are working with MicrobiomeSupport to develop applications in food safety, feed systems, microbial product solutions or microbiome modulators such as pro- and prebiotics, agents and cultures
